where & when you want it.

advertising on both sides of the truck - double the exposure

skins can be changed in minutes and reused as often as desired

solar powered led lighting means 24/7 visibility

gps on board so vehicle movements can be monitored to achieve precise results

hazard lighting front and rear so the truck can be positioned on either side of the road

safety beacon + night lighting back and front

our ad trucks have great on road presence

on board speaker system ideal for trade shows and on-site promotions

on board controller
